

Marsman SpeedWire™ Guidewire

Your Preferred
SFA Access Guidewire

Marsman SpeedWire™ Guidewire

Antegrade feed for instant speed

The Marsman SpeedWire™ is an innovative guidewire specifically developed for easy access to the superficial femoral artery (SFA).

Due to the unique and patented shape consisting of a J tip, deflection curve, and steering curve, access of the superficial femoral artery is easier, safer, and more efficient than with any other regular guidewire.

With the Marsman SpeedWire™ you can easily speed up your next antegrade femoral access procedure and do it right the first time.

J-tip and deflection curve

Steering Curve inside
curved introducer

SFA Access

MM 02-5000-01 ENG Rev. 02

Features:

- Designed to provide easy SFA access with engineered deflection and steering curves
- Comes with introducer for easy introduction to access needle
